St. Mary's Hospital Marks the Beginning of a New Era

Decatur, IL, January 2010 – ADAMS Management Services Corporation (ADAMS), the leading provider of program management and advisory services for the healthcare industry, is pleased to announce St. Mary's Hospital is breaking ground on a \$31M program in early 2010. St. Mary's honored hospital employees and community leaders by allowing them to mark the commencement of construction.

St. Mary's Hospital, founded more than 130 years ago by the Hospital Sisters of the Third Order of St. Francis, plans to complete construction on a new main lobby, emergency department, clinical laboratory and additional facility parking by 2011 followed by the second and third phases of the program.

St. Mary's engaged ADAMS in July 2009 to complete a series of program management tasks which are organized into the three phases. ADAMS is also responsible for procurement of project team members, managing the design process and facilitating the Certificate of Need (CON) reporting process.

ADAMS will manage the construction phase through occupancy and close-out. ADAMS will review and participate in the Construction Manager selection process, lead regularly scheduled project team meetings and continue to monitor the program schedule and budget through occupancy and close-out.
